## Customer Purchase Prediction using Decision Tree Classifier

Name: Rohan Shedge

Internship Domain: Data Science

Task Number: Task 3

Organization: Prodigy InfoTech

Date: 26-07-2025

## **Objective:**

To build a machine learning model that predicts whether a customer will subscribe to a term deposit (purchase a financial product), based on their demographic and behavioral data.

## **Technologies Used:**

Python
Pandas, NumPy – data preprocessing
Scikit-learn – model building and evaluation
Matplotlib, Seaborn – visualization

## **Data Used:**

**Source:**UCI Machine Learning Repository
